

VIN-O-FERM® SAUVIGNON

YEAST FOR THE HIGH QUALITY WHITE WINES

APPLICATION

This *Saccharomyces cerevisiae* (ex. *cerevisiae*) yeast has been selected for quality varietal white wines such as Sauvignon Blanc and similar high quality white wines. It produces the typical aromas respectful of the grape variety. **VIN-O-FERM® SAUVIGNON** is ideal for the cold maceration fermentation process which helps to preserve the aromas. It contributes to the aromatic complexity of great wines, and it reveals important floral notes such as: boxwood, juniper, citrus flowers and grapefruit. It also produces beta-glucosidase.

OENOLOGICAL PROPERTIES

- Fermentation temperature: 14 - 19°C
- Nitrogen requirement: average
- Alcohol tolerance: up to 16 % vol.
- SO₂ production: none
- Fermentation speed: fast
- Alcohol production: high
- Foam production: very low
- Volatile acid production: < 0.15 g/L
- Glycerol production: high
- Killer type: yes
- SO₂ resistance: good

CHEMICAL AND MICROBIOLOGICAL PROPERTIES

- | | | | |
|------------------------|----------------------------|------------------------|---------------------------|
| • Moisture | < 8 % | • Acetic acid bacteria | < 1.10 ⁴ CFU/g |
| • Total viable cells | > 1.10 ¹⁰ CFU/g | • Coliforms | < 1.10 ² CFU/g |
| • Total other yeast | < 1.10 ⁵ CFU/g | • E. coli | absent in 1 g |
| • Total mold | < 1.10 ³ CFU/g | • Salmonella | absent in 25 g |
| • Lactic acid bacteria | < 1.10 ⁵ CFU/g | • Staphylococci | absent in 1 g |

DOSAGE INSTRUCTIONS

Dosage 15 - 25 g/hl, a lower dosage will diminish its fermentative characteristics. In case of the second yeast addition use 30 - 50 g/hl to restart the fermentation. Rehydrate 500 gram **VIN-O-FERM®** yeast in 3.5 liter water or 1.5 liter must. Avoid a temperature difference of 10°C between the hydrated yeast and the must and hydrate for at least 15 minutes but not more than 45 minutes.

We recommend using **NATUSTART™ B** or **NATUSTART™ BCW**. Use **NATUSTART™ GLH** to protect the wine and its delicate flavours.

STORAGE AND PACKAGING

Store in its original packaging preferably at 5 - 15°C in a dry place free from offensive odours. All **VIN-O-FERM®** yeast products are vacuum-packed and are available in 100 and 500 gram alum-foil packages and also in 10 kg alum-foil bags. The yeast can be used for up to 3 years after the date of production.

QUALITY ASPECTS

Yeast selected by OenoBioTech and controlled by the Microflora laboratory at the ISVV of the University of Bordeaux which includes inter-delta sequence (DNA fingerprint) ensuring that each lot of consists of the pure original strain. **VIN-O-FERM®** yeast products are non-GMO and are conform to the specification of the oenological CODEX.
